The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I am writing to urge the FCC not to approve the sale of T-Mobile to AT&T. If allowed, there will remain only a single GSM carrier in the market, gravely wounding citizen choice. Moreover, the mobile market is already so consolidated, the loss of T-Mobile as an independent entity will only further limit choice and reduce competition. Please reject the sale of T-Mobile to AT&T.

Washington, DC 20554

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Charles Capitano

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mary Tindukasiri

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). Thirty years of deregulation have been a demonstrable fiasco for every element of our society except the ultra-rich. Deregulated and under-regulated industries have twice destroyed the savings and loan and banking systems, destroyed the housing market, decimated public services and public employee retirements, distorted the political system, destroyed the social safety net, even destroyed popular sovereignty in this and other countries (GATT, IMF, WTO, NAFTA which, in some cases offer regulations banning regulations). The giant utilities were broken up for a reason, and the reason was the right one: to protect consumers. Allowing AT&T and Verizon to reconsolidate control over 80% of a vital American market could not be more destructive of individual freedom and market choice. The job of the FCC is to protect American consumers and to regulate and protect the private use of the public media, not give carte blanche to corporate predators. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. For many people, wireless communication has become their primary, and for some their only, method of telecommunication and information retrieval. To allow two conglomerates to control and thereby unilaterally limit access to that information and communication is unconscionable. If anything, the FCC should be working to open the market to innovators and creative service providers, not consolidating the market further! If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Patrick weisbarth

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Richard Henry

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jean Marie Ward

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. AT&T is a company that has expanded everywhere. They are defying the monopoly rules and gouging the public both private and business sectors with high rates and proprietary phone systems. Their march to control the cell phone industry needs to be stopped now. I really hate AT& T for overcharging my business for advertising. Their advertising is substandard and overpriced. Their customer service division could care less. I had to talk to at least 6 people for over 6 months to get them to stop double charging me on my business account! They should not even be allowed to be in business! Thank you for listening.

AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Peter Whitford

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Martin & Christine Niemi

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. ATT has terrible customer service, poor coverage and outrageous rates. Further consolidation of the cellular industry will not change this situation, it will only make it worse. If this merger is approved it will just be further evidence of Big Business' control over the US government. It is similar to the ruling to allow the ownership of a maximum of 8 commercial radio station licenses in any one market. Now Clear Channel Communications owns the editorial rights to nearly most of the spectrum and has pushed the smaller radio stations off the air.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Ray Adams

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Sema And Bob English

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). \*\*\*\*\* I am shocked that the FCC would even consider this merger. ATT has an incredibly poor service record based on my experiences and I am in the process of canceling my last ATT account. Almost all of their services are offshore and I never found anyone there who could provide a coherent answer to questions. In addition their spying activities are illegal and yet they were never punished. Please DO NOT let this merger happen. \*\*\*\*\* AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Miriam Lindmeier

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). Consolidation of telecom and media hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. Corporate control of media, and increasing consolidation of that control of media by the country's largest corporate political contributor, is something that affects all Americans, regardless of who their cellphone carrier happens to be. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Don Walker

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Karin Omahony

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. It is important for our country to have competition in the GSM wireless market. Sprint, Verizon, and Virgin Mobile compete for business on CDMA networks. But only AT&T and T-Mobile compete for GSM customers. Those of us who depend on GSM features, such as interchangeable SIM cards and compatibility with international networks rely on this competition to keep rates down and new features and services under development. If you allow the merger of AT&T and T-Mobile, AT&T will have a monopoly on GSM coverage in this country, and thus a monopoly on customers who do business internationally. Please, block this merger. There is no way that it is good for consumers, no way that is good for innovation, and no way that it is good for the airwaves.

Sincerely,

James Feinberg

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Joseph Johnson

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Sarah Fahy

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Kevin Cacciotti

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Louis Simpatico

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Ron Russo

Washington, DC 20554

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Patrick Jacobs

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Please do not allow the monopolization of the cell phone industry. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). Allowing a reduction in competition does not improve the service nor the market in the long run. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Dave Drentlaw

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Louis Amico

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Nona Phillips-Smith

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. Sincerely, Edward Schofield 4840 Maybee Rd. Clarkston MI 48348

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Edin Goolan

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rood Andersson

IMO, AT&T's monopolistic megalomaniacal trend reeks of what TELMEX did to Mexican communications, both telephone AND internet; not only that but they conduct surveillance on all internet users, Telmex or connecting online using wireless connection, e.g. Airport on MacIntosh computers. I have completely disabled Airport on my computer, because even at home in the USA, Airport was giving free reign to surveillance hackers and yer basic garden variety hackers alike. Let's stop AT&T in their tracks, before it's too late..Please?

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Keith Carlson

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Audrey Rogness

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I am both an AT&T Uverse and a T-Mobile customer. I am absolutely opposed to the AT&T take-over of T-Mobile. Not only does this present an almost virtual monopoly, but it grants extraordinary power to a massive corporation with an extremely poor customer service model. AT&T should not be allowed to acquire this company. In doing so, it would have an unfair advantage that it certainly DOES NOT DESERVE. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65).

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Patrick Neri

To the Federal Communications Commission,

The FCC should not make another situation for "too big to fail" which always turns into "corporate welfare". We cannot afford to have monopolies AND a democracy. Monopolies = facism. The FCC should save our democracy! The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Liz Ingersoll-Clark

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Michael Lanphere

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Andriy Portyanko

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Annika Ladewig

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). We need MORE competition in the mobile phone market - not LESS! It's very simple, less competition means more expensive service and less innovation. The costs of mobile service is very high - particularly for low income people; yet these services are essential for modern living. It's just another case where we are making it more difficult for families to survive in what is likely to be an increasingly difficult environment. Please reject this takeover !

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is BAD NEWS for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mildred Meyer

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. I thought monopolies were not allowed in my country. Thought they were illegal. You've already told ATT before to break up. All they are doing is buying back what you told them they couldn't control. Rupert Murdoch is the same way. Stop being moved by the who, and worry more about the why, and what for, and the interior motives of the deal. Att does not need to buy its' own company!

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Justin Kass

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

James Basin

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Laurence Fitzsimons

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Samuel Saison

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Paul Zarchin

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. Unless of course you're hoping for a review of the immoral business practices they had in the 1980. Please remember AT&T tried this once already, there are good reasons to have competition not one GIANT phone company.

Sincerely,

Mitchell Feller

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Valerie Muroki

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. Verizon and AT&T are the most expensive providers at this point; I have a T-Mobile plan with 1,000 minutes for \$100 lasting up to a year. I doubt AT&T will keep that plan! And since I only use my mobile phone for emergencies, I do NOT want a monthly plan. I'm sure there are many like me. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Karen Graham

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Gregory Tada

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Elizabeth Shelby

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC SHOULD NOT consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Lee Bagley

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Joseph Fieber

Washington, DC 20554

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Stephen Rosen

It is time to take the anti-trust laws out of the closet and sweep off the mothballs and cobwebs off them. Corporations today are swallowing up all their competition and creating monopolies and corporations that are "too big to fail." It's time to start breaking them up again, as was done once before with AT&T. Corporations should not get too big to fail, and if you are the steward for the well-being and interests of the American people, you should make sure that competition flourishes. Thank you.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Martha Carlisle

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. I have personally had very negative experiences with both AT&T and Verizon Wireless - being lied to by representatives, the companies not honoring their word/contract in order to fleece me, a disabled consumer on a limited income. I cannot imagine 2 worse companies controlling 80% of the market. T-Mobile was one of the companies that addressed my concerns and gave refunds when I proved some charges were bogus unlike Verizon and AT&T. AT&T has already swallowed up Cingular, another company which had good innovative ideas. Please do not allow them to 'gobble up' T-Mobile also! The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Michael Lichtenstein

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jason Carman

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rita Larimore

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

It is the money aspect that destroys unity. The chance to truly demonstrate service would mean changing the business model FROM what this merger represents! The word symbiotic has too little meaning due to the parasitic attitude of commerce and how the freedom of the internet challenges the profit motive. We need three branches of economy to have a Well-Fair-Nation some day. Profit works great for production but information and service needs to create a better value. The Neo-Con era shows how enslaved we are in Cons/piracy to victimize resources. Com.unity must rise to this calling.

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Ricardo Moreno

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I'm writing to ask you not to consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). This takeover of T-Mobile by AT&T may be good for AT&T but it will be bad for consumers. This is precisely what our anti-trust laws are supposed to prevent. This merger will create a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. If this \$39 billion deal goes through, it will make a mockery of anti-trust laws. The FCC's own strategic plan states "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rebecca McFee

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. Consolidation of media and telecom hurts citizen ability to access the information we need to fully participate in our democracy and hold government accountable. AT&T has a history censoring content and blocking phone features it doesn't like. AT&T's takeover T-Mobile will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Suzanne Boyd

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. Seriously guys, you have to share instead of just being some giant uni-boob!!

Sincerely,

Laura Greene

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. I presently already have access to internet/phone using DSL ONLY through AT&T. AT&T is a monopoly here and I suspect in many areas at this point in time. Allowing T-Mobile to become part of AT&T would only increase the size and power of AT&T's monopoly.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

John Blowen

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Barbara Jones

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Doris Griffith

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Evan Larson

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Dear FCC Commissioners: Please do not narrow the choices for such a growing business as cellular telephony by allowing the AT&T takeover of T-mobile. T-mobile has been a good alternative competitor in the market, and it has introduced many innovative products. Its service has been outstanding, in my experience as a consumer. Please prevent the AT&T/Verizon duopoly from controlling smartphones and all their potential applications in our country. We will fall behind the rest of the world in personal technology. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I am a satisfied T-mobile customer. I switched to Tmobile several years ago because I was unhappy with Cingular and I didn't want to go to Verizon. Now AT&T owns Cingular. Where will I go if AT&T buys T-mobile? The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is a further consolidation of excessive market influence in the telephone market. This would be the completion of a perfect duopoly for mobile phone service. If the FCC is any longer committed to its role as a public protector of the American people from entities who follow their pocketbooks instead of any moral standard, then this consolidation must not be allowed to occur.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

David Day

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rita Rompre

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Judy Simon

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Melissa H.

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. Please don't let yourselves become pawns in AT&T's attempt to circumvent the law to the detriment of the hardworking, voting citizens of this country!

Sincerely,

Sarah Williamson

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jeff Hicks

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Charles Gillet

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Hi, In regards to AT&T possibly taking over T-Mobile – isn't it horrible that things like this – the monopolies being allowed to take over power by the FCC – that we now live in a nation which, when people put their bets (figuratively and also for business investment), many are now saying "I would not bet on the US." It used to be that everyone would put their bets on the U.S. You are singlehandedly bringing the country down by putting too much power in too few hands in the communications world, both our media and phone systems. We need a competitive atmosphere, and we also need companies which do not get so big they control government officials. In the past, AT&T has proven to me that they are a company which does not value its customers. This makes it doubly bad that they would take over a customer-driven company like T-Mobile. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. My entire extended family is on T-Mobile and we are there because we want GSM service and we want great customer and technical support. Our experience and what we continually hear from others on AT&T is that their customer and technical support is awful. This has been going on for years and AT&T has not invested in fixing that problem. Now with AT&T depleting all of their resources to buy T-Mobile, they will bring that wonderful support down to their awful level if not lower. If this takeover is approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market and Verizon does not support the network frequencies that are used by the rest of the world. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Addison McMechan

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). I have worked in the technology field all my life. I have been personally involved with companies that have been taken over by other companies. I have not seen a single case where the takeover has helped the consumer or the user. All it does is make some CEO a pile of cash and perhaps some stockholders richer at the expense of the public or the user. This is so blatantly obvious that this is the so that I see no case where a company involved with the use of public distribution systems of any kind should be allowed to merge. All it does is screw us, the public that provides with our taxpayer dollars the infrastructure without whom they could not exist. This takeover is NOT in the public interest. .

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

David Cobey

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mack Duncan

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). I urge you not to allow AT&T to purchase T-Mobile. Some years ago the telecom industry was broken up in the interest of the consumer. The breakup created competition in the industry and lower prices. It did not create amore honest business environment. AT&T is one of my least favorite businesses at this time. I purchase telecom services for a couple of organizations and businesses and my recent experience with AT&T have been less than satisfactory. Whenever I can I avoid AT&T. It is not in the interest of the consumer to allow an industry to get as close to a state of monopoly as the telecom industry is getting. Lets keep telecommunications competitive.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mario Prickett

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

While the following is a form letter it accurately describes my objections to this merger. I am displeased with both verizon and ATT and honestly feel as though i have no other choice in mobile service already. Tthe market is supposed to take care of itself and consumers are supposed to be able to "vote" with their dollars but nkt when they being held hostage with limited options and multi-year contracts. Please reconsider the approval of this merger and restore my faith in in our representative system. .... The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Richard Bowser

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. When i got my first phone it was with Cingular and i loved it until At&t took over. then i got slammed with overage charges and bad customer service. now that im with Tmobile i love my service again. They have the most affordable plans around and for those of us with not a lot of money it's perfect. even those of us who are trying to get jobs. At&t prices are so high that it would make it nearly impossible for someone who are trying to get off the streets, and they need a phone to contact help sources to better themselves. we can't keep letting companies devour other company's. as Americans we have the freedom of choice and if this takeover happens we'll have less choices. please don't let this happen.

Sincerely,

David Tasarz

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). In these dire economic times, this merger will create an oligopoly in the telecom industry. Prices will go higher and we consumers will be mad as hell. You will be accountable for your actions in the next election if this merger is approved. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. On a personal level, I have had my cell phone service with t-Mobile for years because it is dependable and they deliver what I pay for – no games, obscure contracts, etc. With AT&T by contrast, the various services I have gotten from them over the years have been the opposite experience. Most recently got rid of their internet and phone service for my business because they weren't able to deliver the internet speed I was paying for. Please don't let it ruin the straight-forward service I have had with T-Mobile. Sincerely, Mari Strain 5815 San Diego Street El Cerrito, CA 94530

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jymmi Sparkz
